LinqWhereByTypeExpression is one of more than 130 LINQ expressions.

- See [LINQ](#) for details about LINQ and the AI-Framework.
- Go to the category for [all LINQ expressions](#).

What it is

LinqWhereByTypeExpression is used to ...

Code example

```
if (left == null || right == null)    return null;return new And  
Expression(left, right);
```

Explanation of the example

If two booleans (left and right) are both not null (line 1), the AND of these two booleans is returned (line 4).
